

A Revolution in Cordless, Battery-Free, *Worry-Free* Scanning

Tired of the expense and hassle of battery-powered scanners? With the new Xenon™ 1902g-bf scanner, you'll never have to buy or dispose of another expensive battery again.

Powered by fast-charging super-capacitors, the Xenon 1902g-bf is battery-free and cordless. This breakthrough technology enables the Xenon 1902g-bf to easily scan over 450 barcodes on a single charge – and be recharged and ready to scan in less than 15 seconds. Now, that's hassle-free, worry-free retail scanning.

The Power of Battery-Free

Why bother with the expense and hassle of a battery-powered scanner for your retail operation? The new Xenon™ 1902g-bf scanner eliminates batteries and cords for a completely worry-free scanning solution.

Powered by fast-charging super-capacitors, this breakthrough scanner easily scans over 450 barcodes on a single charge – and is ready to scan after just 15 seconds of charging.

Plus, unlike expensive Lithium-Ion batteries, which generally need to be replaced 2–3 times over the life of the scanner, long-lasting super-capacitors typically last over 5 years. Now, that's a scanning solution that's ready to go the distance.

A Truly “Green” Scanning Solution

Never worry about batteries again with the Xenon™ 1902g-bf – the only battery-free 2D scanner available today. With no batteries to dispose of, you’re not only helping the environment, you’re saving money at the same time. And because there are no batteries, you avoid the shipping headaches that come with Lithium-ion batteries. Now, that’s something everyone will love.

No battery doesn’t mean no power. The Xenon 1902g-bf supports over 450 scans on a single charge, more than enough to check out 25 customers or scan hundreds of items. With recharge alerts and fast recharge capability, you never have to worry about being ready to scan again.
