

So comfortable they just might forget they're wearing it.

When your crew is in the field, they don't have time to juggle bulky devices. Lucky for you: They'll never break stride when they're wearing a SuperFit PR printer. The smallest. The most durable in its class. The lightest receipt printers around. Swipe credit cards and print hundreds of invoices on a single charge. Easily connect PR printers to mobile devices like they were made to go together – because they were. And share charging cradles with Intermec computers, ensuring your infrastructure costs stay equally comfortable.

**Intermec SuperFit PR2 & PR3 Printers: The new standard in comfort.**
