

Four breakthrough products.  
One powerful platform.

[Learn More >>](#)

The 70 Series is the new family of next generation, ultra-rugged mobile computers purpose-built for their environments. Four breakthrough products built on the same powerful platform that was engineered to give users everything they need with no trade off in size, ruggedness or functionality.

**The 70 Series gives you:**

- Optimal device size, weight and ruggedness
- The choice of four ergonomic designs with one common platform
- Full compatibility with printers, application software, communications, peripherals and accessories
- A comprehensive enterprise business solution
- On-board diagnostics and INcontrol Managed Services provide device health visibility
- Exceptional battery life to eliminate downtime
- Advanced imaging technology for remarkable read range, tolerance to motion and low light
- Indestructible keypads
- Increased efficiency and profitability

All performance, no compromise. See all the ways the 70 Series can help your organization operate more profitably.
